ABOUT ME

Software Engineer with 6+ years in iOS development (**Swift, SwiftUI**) and a growing track record in **AI/ML** — from energy-forecasting pipelines to an AI-powered health app launching on the App Store. Pursuing a Master's in Computer Science to deepen this foundation and contribute to research-grade AI problems.

WORK EXPERIENCE

🏢 **OBSS - BKT (Banka Kombëtare Tregtare)** – Istanbul, Türkiye

iOS Developer, Software Engineer

[26/12/2022 – Current]

- Architected [BKT Smart](#) & [BKT Kosova Mobile](#) — banking apps serving **250K+ users** in Albania and Kosovo — using **Clean Architecture** and **SwiftUI** migration
- Maintained **99%+** bug-free releases through unit and UI test coverage (**XCTest**); implemented secure-payment stack: QR payments, **JWT**, **SSL pinning**, **Keychain**, Wultra Shield
- Built **WidgetKit** widgets and Lottie animations; managed CI/CD (**Bitrise**), deployments (**TestFlight**, Firebase), and production monitoring (**Firebase Crashlytics**, Countly); consumed and documented RESTful APIs (**Swagge**r) with background fetch and deep linking
- Collaborated in multinational **Agile/Scrum** teams across Turkey, Albania, and Kosovo using Jira and GitLab — all communication in English

🏢 **EPAM Systems/Emakina** – Izmir, Türkiye

iOS Engineer

[19/10/2020 – 23/12/2022]

- Delivered iOS features for [Nike](#), [Under Armour ME](#), [Bloomingdale's Middle East](#), [Dropkick](#), [Nice Stores](#), and [TH AT Concept Store](#) across UAE, Saudi Arabia, and Kuwait; Objective-C → Swift migration with **MVVM** and SOLID principles
- Built Arabic–English bilingual UIs with full **RTL** layout support; integrated **Apple Pay** (PassKit), Apple Login (AuthenticationServices), **Face ID/Touch ID**, and **MapKit** Click & Collect
- Managed CI/CD (**CircleCI**), code quality (**SonarQube**), and analytics (Firebase, Snowplow, **Google Analytics**); collaborated in multinational Agile teams across Europe, UK, and Dubai
- Utilized **SnapKit**, **Alamofire**, **Moya**, **SDWebImage**, CocoaPods, SPM, SwiftLint, and SwiftGen for modular, maintainable codebases

🏢 **Onur Enerji** – Izmir, Türkiye

Junior Data Scientist

[01/04/2020 – 15/07/2020]

- Built end-to-end ML pipelines in **Python** for electricity consumption forecasting and demand-peak prevention using regression and ensemble models; orchestrated with **Apache Airflow**
- Performed feature engineering on energy/weather datasets (WeatherMap API); conducted EDA and built visualisation dashboards (**Tableau**, **Kibana**, **R**); stored results in **MySQL** and **Elasticsearch**

Software Engineer Intern

[27/05/2019 – 15/08/2019]

- Designed ETL pipelines with **Apache NiFi** and Java consuming EPIAS REST APIs; processed JSON electricity market data and persisted to **MySQL**
- Supported [carbon.ninja](#) with **Elasticsearch** indexing and analytics infrastructure

PROJECTS

[26/04/2026 – Current]

Sana - AI Health & Nutrition App

- **SwiftUI + HealthKit + Claude AI API** (Anthropic): AI-powered meal recommendations and calorie tracking with real-time health data inference, allergy/diet personalisation, 6-language localisation (TR, DE, EN, ES, PT, FR)

Chest X-Ray Pneumonia Detection

- **EfficientNet-B0** with transfer learning on NIH chest X-ray dataset; **Grad-CAM** for model attention visualisation — full ML pipeline from data loading to explainability (**PyTorch**, Python)

ML Job Analyzer

- NLP scraper (**Python**, **Pandas**, BeautifulSoup) analysing ML job listings for emerging skill trends — built to map the AI/ML field during personal career transition

ARObjectDetection — Graduation Project

- iOS app (**ARKit + Firebase**): real-time object recognition retrieves structured data from Firebase — early convergence of computer vision and mobile engineering

ROS Motion Control System (TurtleSim — ConcentricCircle) Autonomous trajectory generation for ROS TurtleSim using kinematic models and circular motion algorithms in **Python (ROS)**

Basic Voice Assistant Speech-to-text, **NLP**, and TTS synthesis for real-time task automation in **Python**

EDUCATION AND TRAINING

Software Engineer

Yasar University [01/08/2015 – 30/07/2020]

City: Izmir | Country: Türkiye

- Full English-medium instruction · GPA 2.70/4.00
- Coursework completed at Yaşar University; diploma issued by Beykent University — both recognised per **KMK/ZAB** evaluation (Reg. LN2025/77597-1, August 2025)
- Key courses: Artificial Intelligence · NLP · Data Structures & Algorithms · Automata Theory · Software Design & Architecture · OS & Networking · Mobile Robotics (**ROS**) · Probability & Statistics
- Graduation Project (A / A-): ARObjectDetection — iOS app (**ARKit + Firebase**) for real-time object recognition

Management Information Systems

Anadolu University [01/08/2019 – Current]

LANGUAGE SKILLS

Mother tongue(s): Turkish

Other language(s): English | German

CERTIFICATIONS

[Coursera, 01/06/2026]

Google AI Professional Certificate

[IELTS, 26/04/2026]

IELTS Academic 6.5 (L:7.5, R:6.5, W:6.0, S:6.5)

[telc, 23/03/2026]

telc Deutsch C1 Hochschule (154/214)

[LinkedIn, 16/12/2022]

SwiftUI Essential Training

CONFERENCES AND SEMINARS

[28/06/2025 – 28/06/2025] Izmir

Mein Weg nach Deutschland (Goethe Institut) Conversational German scenarios on living in Germany

[23/11/2019 – 23/11/2019] Izmir

Google Developer Group Conference AI/ML applications in healthcare and mobile development

VOLUNTEERING

[18/01/2018 – 05/02/2019] Izmir

Sokak Corbacilari weekly preparation and distribution of soup for people in need - [Sokak Corbacilari](#)

ADDITIONAL EXPERIENCES

Kitchen Help & Grocery Clerk

- Work & Travel USA, 2018 (Orleans, Massachusetts) — kitchen help (Nauset Farms) and grocery clerk (Shaw's Supermarket); built practical English fluency in a fully immersive international environment
- Professional experience in multinational teams across Europe, Balkans, Jamaica, South America — all technical communication in English
