 github.com/mcagridemir

Senior iOS Developer with expertise in Swift, SwiftUI, and Objective-C, experienced in MVVM, Clean Architecture, and scalable app development. Skilled in RESTful APIs, Core Animation, MapKit, WidgetKit, and Apple HIG compliance. Strong background in secure financial features (Apple Pay, Face ID, Touch ID, JWT, Deep Linking, Keychain). Proficient in CI/CD (Bitrise, CircleCI, Fastlane), Firebase Crashlytics, SonarQube, and Agile/Scrum workflows. Proven record of delivering high-performance, testable apps for 200K+ users and collaborating in multinational teams across Europe, UK, Dubai, and Albania with fluent English communication.

Professional Experience

12/2022 – Present

iOS Engineer, OBSS&BKT

- Built and maintained iOS banking apps using **Clean Architecture** and **SwiftUI migration**, serving **200K+ users**.
- Delivered **99% bug-free** releases via **unit/UI tests** and robust QA practices.
- Enhanced UX with **WidgetKit** widgets, **Lottie** animations, and **SDWebImage** optimizations.
- Integrated secure financial features: **QR** payments, **RIA** Money Transfer, **JWT**, **Keychain**, **SSL pinning**, certificates.
- Managed CI/CD pipelines with **Bitrise**, deployed via **TestFlight** & **Firebase App Distribution**.
- Consumed/documented RESTful APIs (**Swagger**); implemented **background fetch** and **Deep Links**.
- Monitored app performance with **Firebase Crashlytics** & **Countly Analytics**.
- Collaborated internationally in **Agile** teams using **Jira**, **GitLab**, and **code reviews** with English communication.

10/2020 – 12/2022

iOS Developer, EPAM Systems/Emakina

- Developed iOS apps using **Swift**, **MVVM**, **UIKit**, including **Objective-C to Swift migration**.
- Built **pixel-perfect UIs** with **SnapKit**, **XIBs**, **Storyboards**, **reusable views**, and **Core Animation** (Nike login).
- Integrated **Apple Pay**, **Google/Facebook Login**, **Face ID/Touch ID**, and **Click & Collect** features (**MapKit**, **Google Maps**, **Core Location**).
- Optimized performance with **GCD**, managed **CI/CD pipelines** (**CircleCI**), and ensured code quality with **SonarQube**.
- Consumed and tested **RESTful APIs** (**Insomnia**, **Postman**) and tracked analytics with **Firebase**, **Google Analytics**, **Snowplow**.
- Utilized **CocoaPods**, **Swift Package Manager**, **SwiftLint**, **SwiftGen**, **Alamofire**, **Moya**, **SDWebImage**.
- Worked in **multinational Agile teams** with **Jira**, **Bitbucket**, **Sourcetree**, performing code reviews in English.

04/2020 – 07/2020

Software Developer, Junior Data Scientist, Onur Energy&Software

- Developed an **AI project** to reduce electricity consumption and prevent peaks.
- Integrated and processed data from **WeatherMap API** using **Python**; orchestrated workflows with **Apache Airflow**, stored results in **MySQL**.

06/2019 – 07/2019

Software Engineer Intern, Onur Energy&Software

- Automated data pipelines with **Apache NiFi**, Java, and regular expressions.
- Consumed and processed **REST APIs** from **EPIAS**, manipulating **JSON data** for electricity analysis in **MySQL**.

Projects

12/2022 – Present

BKT Smart & BKT Kosova Mobile – Banking Applications [↗](#)

- Developed iOS apps with **Clean Architecture**, **SwiftUI migration**, and **modular reusable views**.
- Built **core banking features**: Customer Onboarding via **National ID verification**, Account Management, Loyalty Cards & Preferential Exchange Rate, Fund Transfers & Cardless Withdrawals, Loan Management & Installments, Pension, Bill & Invoice Payments, Notifications, Transaction List.
- Enhanced UX with **WidgetKit widgets** and **Lottie animations**; wrote **Unit/UI tests** for **99% bug-free releases**.
- Secured apps with **Wultra Shield**, **SSL pinning**, **Keychain**, **JWT**, and **certificate management**.
- Managed **Deep Links**, **QR payments**, **RIA Money Transfer**, and **CI/CD pipelines (Bitrise)**; handled **TestFlight deployments**.
- Collaborated internationally in **Agile/Scrum teams** using **GitLab**, **Jira**, **Confluence**, **Slack**, **Discord**; integrated custom internal libraries for modular development.

05/2022 – 11/2022

Nike – Sports Wear & Sneakers [↗](#)

- Developed foundational architecture and **core app features**: Splash screen, animations, language & country selection, user registration, main navigation tabs (**MVVM**, **SOLID principles**).
- Built **modular reusable UI components** with **Auto Layout** and **Arabic-English RTL support**.
- Implemented **concurrency (GCD/OperationQueue)** and event tracking/analytics with **SnowplowTracker** and **Firebase**.
- Managed **App Store submissions** and **CI/CD deployment (CircleCI)**; ensured code quality via **SonarQube**.

02/2022 – 05/2022

Dropkick – Online Shopping iOS Application [↗](#)

- Built the app from scratch using **MVVM-R** and **SOLID principles**.
- Developed features: Product List, Filter, Sort, Sign Up, Login, time-limited/raffle functionalities.
- Created **modular reusable UI components** with **Auto Layout**; implemented **concurrency** and **event tracking/analytics (Firebase, Google Analytics)**.
- Ensured high-quality, testable code with **Unit/UI tests (Quick/Nimble)**, pull request reviews, and Agile practices.
- Managed **App Store approval** and **CI/CD pipeline (CircleCI, SonarQube)**.

10/2021 – 02/2022

Under Armour ME - Shop Online on the App Store [↗](#)

- Key iOS developer for Product Detail, Address Management, and checkout flows.
- Implemented **Arabic-English localization**, full **RTL support**, and **Click & Collect (Google Maps, MapKit, CoreLocation)**.
- Optimized product detail & payment flows using **GCD**; integrated **event tracking/analytics (OptimoveCore, Firebase)**.
- Ensured code quality with **Unit/UI testing (Quick/Nimble)**, API testing (**Insomnia**), and CI/CD management (**CircleCI, SonarQube**).

04/2021 – 10/2021

Nice Stores – Online Shopping [↗](#)

- Developed **MVC-R app** from scratch; implemented **core shopping flows** and **modular reusable components**.
- Optimized performance via **GCD**; integrated analytics with **Firebase** and **Salesforce**.
- Managed **App Store submission** and **CI/CD pipeline** (**CircleCI**, **SonarQube**).
- Handled networking via **Alamofire** and **URLSession**.

01/2021 – 04/2021

Bloomingdale's Middle East – E-Commerce App [↗](#)

- Joined mid-project; contributed to new features, bug fixes, and UI optimization.
- Improved **background processing** with **GCD/OperationQueue**; integrated **event tracking/analytics** (**Firebase**, **Salesforce**).
- Participated in code reviews and managed **CI/CD releases** (**CircleCI**, **SonarQube**).

10/2020 – 01/2021

THAT Concept Store – Luxury Shopping [↗](#)

- Focused on **bug fixes**, **UI/UX improvements**, and **adaptive layouts** (**SnapKit**, **Auto Layout**).
- Developed **secure payment flows** with **Keychain** and **SwiftUserDefaults**; optimized performance using **GCD**.
- Participated in code reviews and CI/CD management; handled networking via **Alamofire**, **URLSession**.

Languages

English — C1

German — B1-B2

Turkish — Native

Education

09/2019 – 07/2025

Bachelor Degree of Management of Information Systems,
Anadolu University

09/2015 – 07/2020

Bachelor Degree of Software Engineering, *Yasar University*

- Completing courses in computer science, mobile application development, robotics(ROS), statistics, artificial intelligence, artificial neural networks
- Volunteered on a monthly basis to prepare meals, for whom need something to eat, at the local community

Technologies

Swift (5→6), **SwiftUI**, **UIKit**, **Async/Await**, **MVVM**, **MVC**, **MVVM-R**, **WidgetKit**, **Lottie**, **SDWebImage**, **SnapKit**, **Auto Layout**, **Modular UI Components**, **Modular Architecture**, **Reusable Views**, **CoreLocation**, **MapKit**, **GoogleMaps**, **AVKit**, **WebKit**, **SwiftUserDefaults**, **KeyChain**, **AuthenticationServices** (Apple Login), **PassKit** (Apple Pay), **CocoaPods**, **SwiftGen**, **SwiftLint**, **Firebase**, **Salesforce**, **OptimoveCore**, **Xtremepush**, **MoEngage**, **GoogleTagManager**, **GoogleAnalytics**, **SnowplowTracker**, **SkeletonView**, **PanModal**, **Moya**, **Alamofire**, **URLSession**, **RESTful APIs**, **Swagger**, **TestFlight**, **Wultra Shield**, **JWT**, **SSL Pinning**, **Certificates**, **CI/CD** (**Bitrise**, **Fastlane**, **CircleCI**), **BitBucket**, **Jira**, **Insomnia**

Courses

09/2025

B2 Deutsch Teilnahmebestätigung, *Goethe Institut*

12/2022

SwiftUI Essential Training, *LinkedIn*
